## Manager's Comments

On behalf of Village Council and Staff, I am pleased to present the 2022 Annual Report for the Village of Granville. This report provides residents both key functional and financial information on our municipal operations, as well as our major accomplishments and initiatives over the past year.

The year 2022 began with news of Intel's planned investment of more than \$20 billion in the construction of two microchip factories in Licking County. This is perhaps the largest economic development effort ever in the State of Ohio and will bring significant growth to our region. With growth comes change and we welcome the opportunity to responsibly shape the future of our community for the next generation.

While Intel underpinned most major decisions and planning efforts in 2022, we still succeeded in our core mission to provide the Granville community with premier local government services that meet the needs of its citizens. Much of this success came with the help of civic participation from our residents, effective Village Council leadership, and insight from our valued community partners.

My thanks to you all...

*Herb Koehler*

## Village Council

Melissa Hartfield, Mayor

Jeremy Johnson, Vice Mayor

Phill Demarest   ▪   Rob Montgomery   ▪   Laura Mickelson

Aaron Olbur   ▪   Kim Keethler Ball

Village Council serves as the legislative and policy-making body of Granville. Village Council takes a leadership role to interpret the wishes of the community and provides for the general welfare of the Village through programs, services, and activities.

In 1964, the Village of Granville adopted a municipal charter with a Council/Manager form of government. The Village Council consists of seven elected members at large, serving four-year terms. The positions of Mayor and Vice Mayor are chosen through nomination and election by a majority of Council. The Mayor serves as the official and ceremonial head of the municipality, presiding over meetings of Council and exercising judicial powers. The Council appoints a Village Manager to oversee the daily operations of the Village.

### Appointed Positions

Village Manager

Herb Koehler

Clerk of Council/Executive Assistant

Autumn Klein

Chief of Police

William Caskey

Village Law Director

William Mattes, Dinsmore & Schohl, LLP

[www.granville.oh.us](http://www.granville.oh.us)

# Boards and Commissions

## Board of Zoning Appeals

Jeff Gill  
Neal Zimmers  
Larry Burge  
Kenneth Kemper  
Drew Menzer

The Zoning Board is responsible for the review and approval of variance and conditional use requests within the Village.

## Planning Commission

Jack Burriss  
Craig Potaracke  
Sarah King  
Rod Osbourne  
Bill Habig  
Laura Mickelson ex-officio  
Jeremy King ex-officio

The Planning Commission is responsible for the review and approval of rezoning requests, subdivision development, site and architectural plan review.

## Bryn Du Commission

Joe Hickman  
Keith Myers  
Reed Fraley  
Don Gibson  
Candi Moore  
Stewart Dyke  
Jurgen Pape  
Phil Demarest ex-officio

The Bryn Du Commission is responsible for managing the everyday operations of the Bryn Du Mansion, implementing the development plan, and planning for the future of the property

## Granville Arts Commission

Jurgen Pape  
Angels Katona  
Laura MacKenzie-Crane  
Mickey Smith  
Marilyn Sundin  
Lois Foreman-Wernet  
Billie Zimmers  
Kyle Morgan  
Jeff Watkins  
Kim Keethler Ball ex-officio

The commission is a community based organization dedicated to the enhancement of cultural arts, community character, and community interaction.

## Union Cemetery Board

Kevin Bennett  
Lyn Boone  
Rob Montgomery

The Board oversees the running of the Old Colony Burying Ground as the cemetery is managed by both Granville Township and Village of Granville

## Tree & Landscape Commission

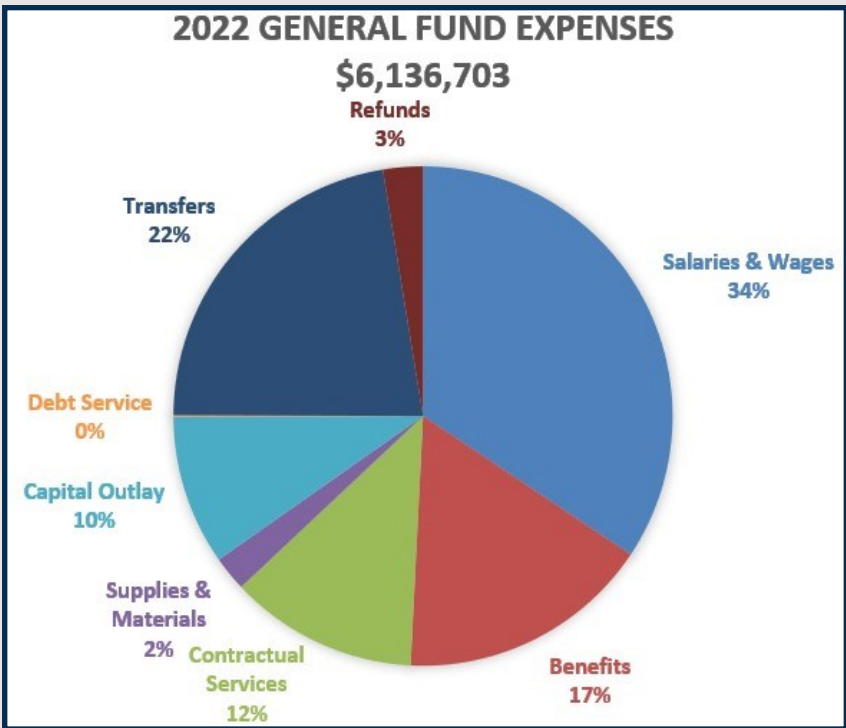

Don Hostetter  
Lynne Kishler  
Dick Mortensen  
Don Pheneger  
Linda Reynolds  
Rob Montgomery ex-officio

Tree & Landscape is responsible for reviewing landscape development plans, directing the planting of trees in the Village, the Arbor Day celebration, and the Tree City USA program

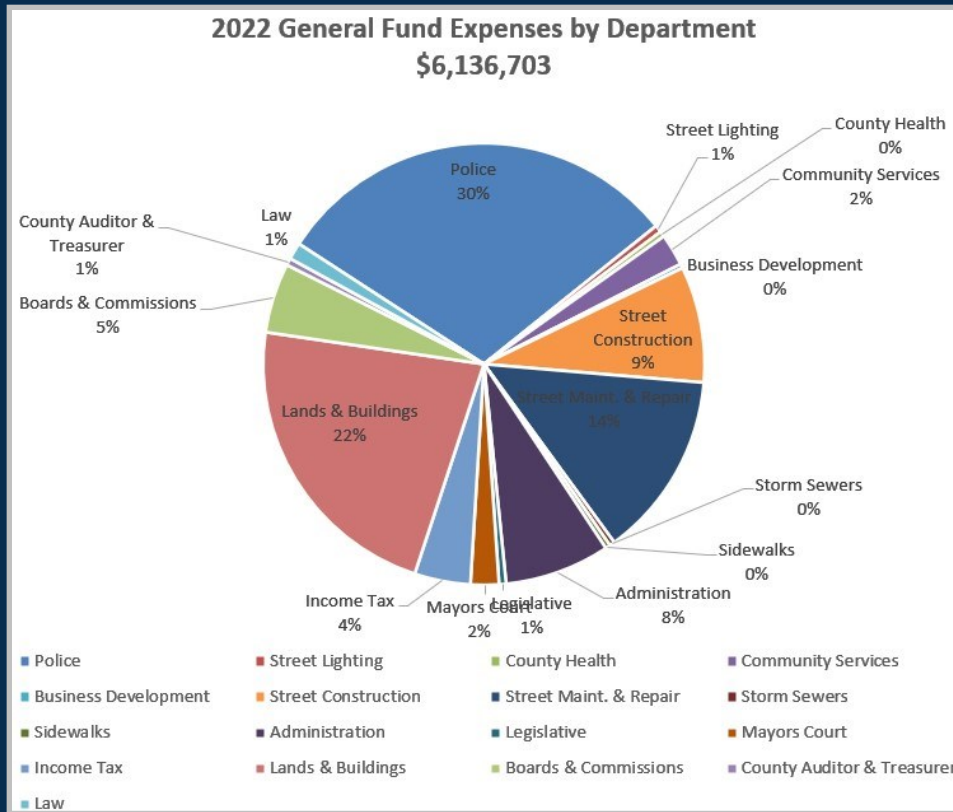

# Finance Report

The Finance Department is responsible for maintaining the Village's financial assets and investments. It oversees and coordinates cash and debt management, budget, purchasing, accounting, auditing and reporting, revenue administration, billing and collections, employee payroll, and human resource services. The Village of Granville is committed to fiscal accountability and transparency with its budgetary and financial information. Granville's Annual Financial Statements are audited bi-annually in accordance with the Ohio Revised Code. You can find the Village of Granville budget and current audit report on the Village website.

How are the Village's tax dollars spent?	
<b>2022 General Fund Expenses By Category:</b>	
Salaries & Wages	\$2,108,054
Benefits	\$1,009,182
Contractual Services	\$748,791
Supplies & Materials	\$138,414
Capital Outlay	\$595,214
Debt Service	\$6,175
Transfers	\$1,372,445
Refunds	\$158,428
<b>TOTAL GENERAL FUND EXPENSES</b>	<b>\$6,136,703</b>

# 2022 General Fund Expenses By Department

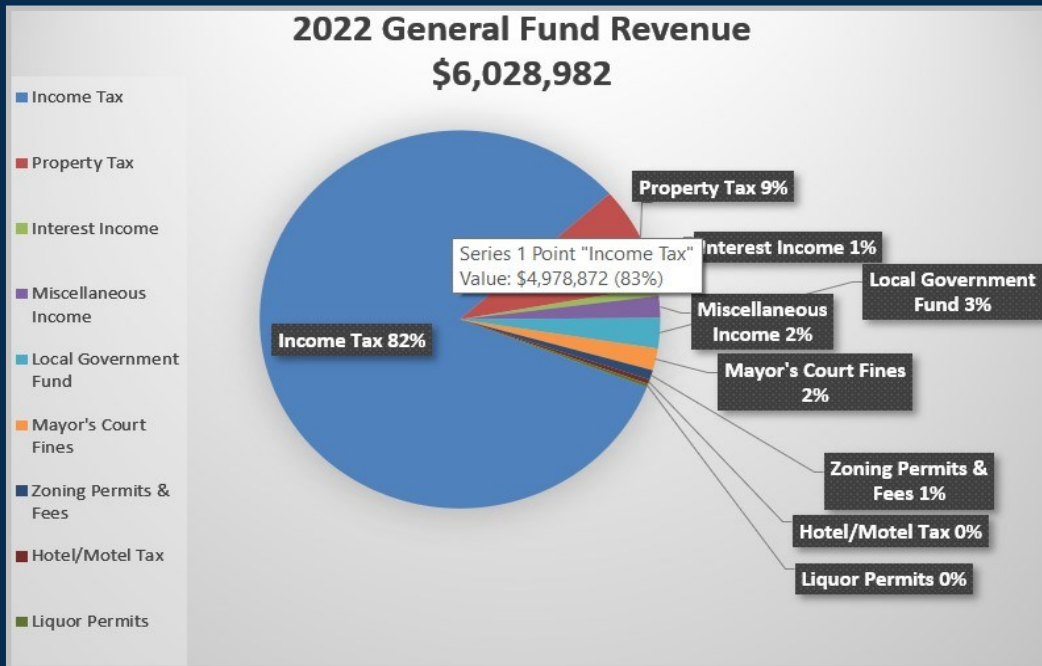

<b>2022 General Fund Expenses By Department:</b>	
Police	\$1,845,710.00
Street Lighting	\$32,662.00
County Health	\$24,661.00
Community Services	\$143,746.00
Business Development	\$19,000.00
Street Construction	\$522,120.00
Street Maint. & Repair	\$835,242.00
Storm Sewers	\$23,356.00
Sidewalks	\$21,784.00
Administration	\$473,131.00
Legislative	\$31,473.00
Mayors Court	\$127,029.00
Income Tax	\$251,813.00
Lands & Buildings	\$1,364,405.00
Boards & Commissions	\$313,466.00
County Auditor & Treasurer	\$31,715.00
Law	\$75,390.00
<b>TOTAL GENERAL FUND EXPENSES</b>	<b>\$6,136,703.00</b>

# Revenue Sources

## Where Does Village General Fund Revenue Come From?

Where does the Village's General Fund Revenue Come From?

Income Tax	\$4,978,872
Property Tax	\$529,739
Interest Income	\$48,755
Miscellaneous Income	\$112,175
Local Government Fund	\$156,576
Mayor's Court Fines	\$113,009
Zoning Permits & Fees	\$49,366
Hotel/Motel Tax	\$23,074
Liquor Permits	\$17,416
<b>TOTAL GENERAL FUND REVENUE</b>	<b>\$6,028,982</b>

# Income Tax Report

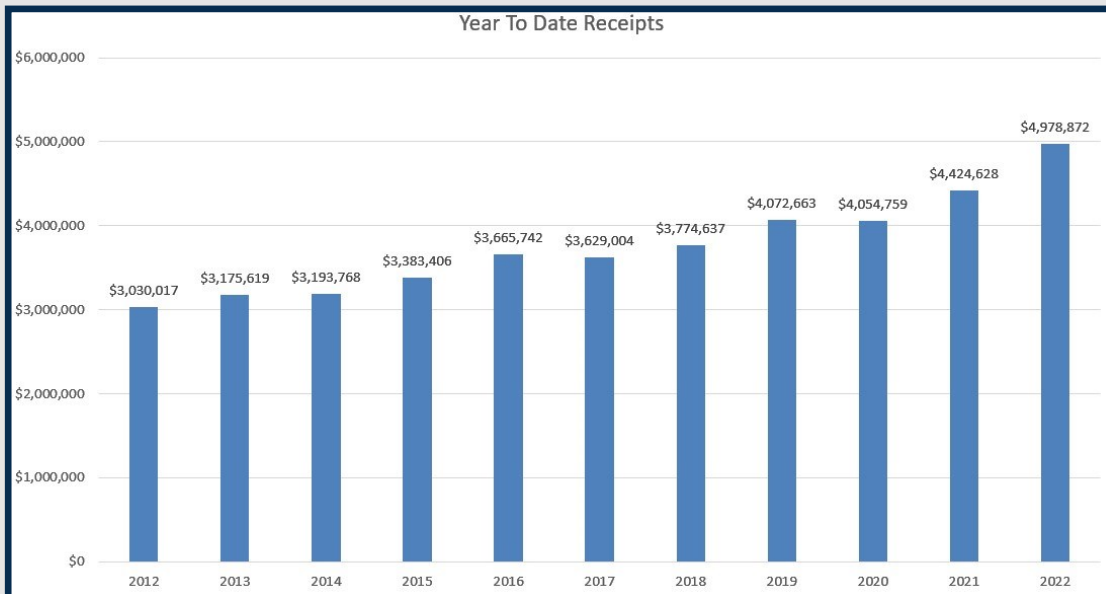

Income tax represents the largest source of revenue for the Village of Granville at approximately 76% of the general fund. Residents benefit from a beautiful treescaped community, efficient snow removal, police services, streets, street lighting, monthly brush pick-up services, and the clean-up/fix-up program through our refuse pick-up. Residents support the cost of these services mainly through their income tax.

The purpose of the income tax is to provide funds for general municipal operations and governmental services such as police, street maintenance, administration, capital improvements, and community service.

The 1.5% income tax was implemented in 1969 and is assessed on all salaries, wages, commissions, and other compensation earned by residents. Those employed within the Village limits are subject to the municipal income tax. All residents living in the Village and the businesses located within the Village are required to register with the tax department.

**Tax Collected in 2022:  
\$4,978,872.25**

# Planning & Development Department

2022 was a year of transition and excitement for the Planning and Development Department. The year began with the historic Intel announcement, placing Licking County in the center of future development. Being only 15 minutes from the proposed site, Granville suddenly found itself on the forefront of the development landscape. The excitement continues into 2023, with projects on the horizon.

This report covers the happenings within the Department of Planning & Development, as well as general goings-on within the Village. Despite the dual pressures of historic development and economic uncertainty, the Village of Granville emerged from 2022 stronger than ever. In this report, you will find data relating to the number of permits the department processed and approved, as well as a report on the status of those permits submitted in 2022. Data on new homes, subdivisions, and businesses are also included.

The Department of Planning & Development is always available to assist the public. I encourage you to reach out to myself, or any of our outstanding staff, if you ever have any questions or concerns regarding planning, zoning, development, or anything about how the Village is built and functions.

**Darryll W. Wolnik, AICP – Director of Planning & Development**  
[dwolnik@granville.oh.us](mailto:dwolnik@granville.oh.us) 740-587-5202

Deb Yost, ASLA – Long Range Planner [dwalkeryost@granville.oh.us](mailto:dwalkeryost@granville.oh.us)  
740-587-5243

Jennifer Rubal – Zoning Administrator [jrupal@granville.oh.us](mailto:jrubal@granville.oh.us)  
740-587-3997

David Dudgeon – Zoning Inspector [ddudgeon@granville.oh.us](mailto:ddudgeon@granville.oh.us)  
740-587-5206

## STAFFING & ORGANIZATION

The department came into 2022 as the Planning Department, and emerged into 2023 reimagined as the Planning and Development Department. So, what changed? Previously, the department was solely focused on planning and zoning, neglecting to handle economic and community development tasks. As part of the evolution of the department, and to bring it into line with other municipalities, development was made a significant goal of the department, alongside traditional planning and zoning. The new department handles not just its previous tasks, but also new tasks relating to business development, economic growth and sustainability, and community outreach.

# Planning & Development Department

## 2023 PROJECTS

In January, the Village embarked upon an update to the 2012 Comprehensive Plan. Stakeholders from the Village, the Township, Granville Schools, Granville Recreation District, the Granville Chamber of Commerce, and Denison University came together to review and update goals to guide the Granville area into the future. Planning & Development staff developed a survey that would capture thoughts and sentiments of residents and visitors alike. Distributed electronically, the survey was able to obtain engagement from over 900 residents and visitors. To better understand the results, students from Denison University's data analytics program analyzed the survey and presented the results. Their expertise and input were an invaluable part of the Comprehensive Plan update.

Planning and Development staff also undertook the 2022 Downtown Granville Parking Study. Staff wanted to understand the basis and voracity of parking complaints for the downtown area, while gathering data for analysis for future land uses. Real-time parking data was collected over the course of two months, during the day and on evenings and weekends. The data was processed and presented in a draft study. As part of the parking study, an ad hoc parking committee was established. Their mission was to analyze the results, identify problems, and present solutions. The committee's work continues into early 2023.

## PERMITTING AND PROJECTS

The Village of Granville has four subdivisions under active construction. These four subdivisions represent the most significant ongoing development in the Village. There are 69 total lots within these subdivisions, though they are in various stages of development. Figure 1 shows their locations within the Village, while Table 2 shows information pertaining to number of lots, average size of lots, and number of lots completed.

Figure 1: Location of Subdivisions in Granville

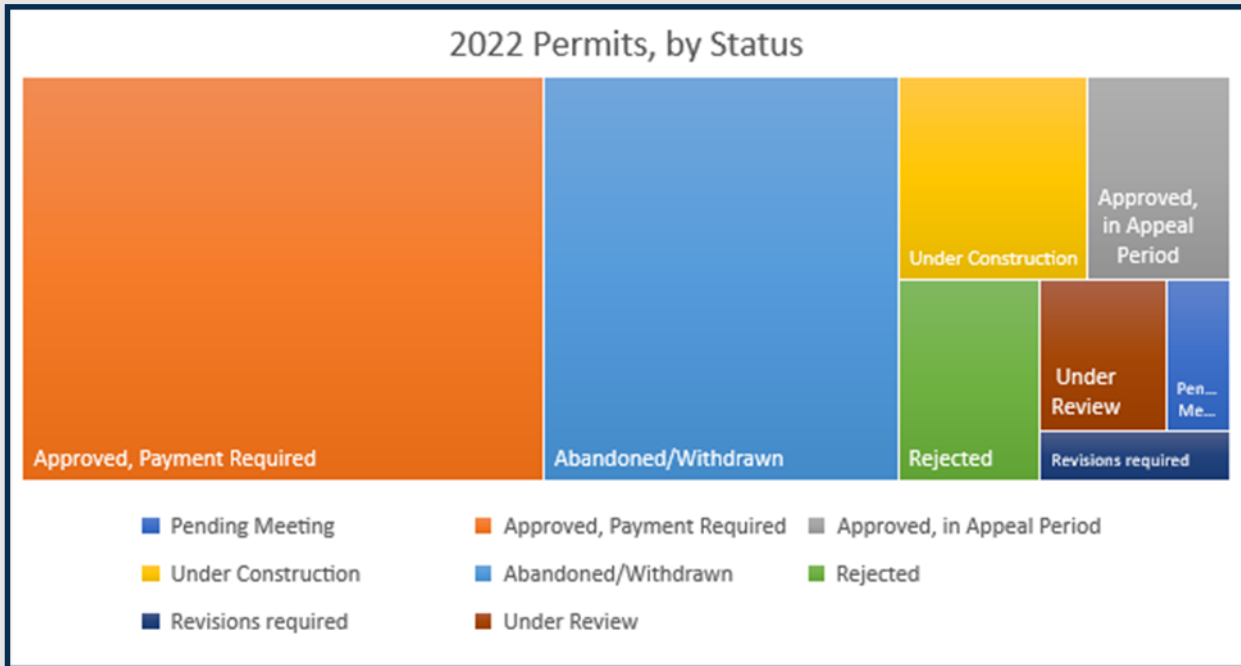

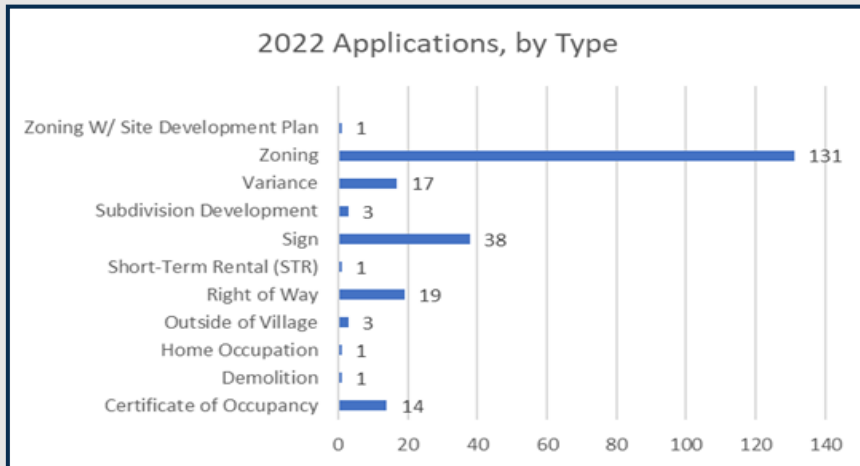

Table 2: Subdivisions in Granville

Name	Total Lots/Units	Lots Completed	Average Lot Size
Village Roots	9	5	14,113 Square Feet
Terra Nova	4	1	31,472 Square Feet
Glenshire	30	0	13,155 Square Feet
Courtyards at Cherry Valley	26	2	N/A

# Planning & Development Department

## 2022 PERMIT APPLICATIONS

Despite the attention given to subdivisions in the realm of planning, the bulk of the day-to-day work for the department comes from zoning permits. 229 permits were processed in 2022, with 207 being approved. Those remaining permits were either withdrawn, or are still in review. Table 2 below outlines the number and type of permits processed by the Planning & Development Department in 2022. As can be seen, zoning permits accounted for the bulk of work done. Zoning permits cover items such as roof replacements, accessory buildings, and home additions.

## Highlights of 2022

- Licking County Community Center moves to the Bryn Du property for all programs
- Total Barn Restoration project is officially underway!
- Community events like Bryn Du Art Show, Garden Club Daffodil Show, Taste of Granville, and Polo on the Great Lawn bring thousands to the Bryn Du Campus

For more than a century, the historic Bryn Du Mansion has dominated the landscape as a 52-acre estate in the charming Village of Granville. The mansion's colorful history and the history of the families that have lived there, add to the rich environment and unique facilities. The Federal-style sandstone mansion, circa 1905, features hand-crafted wood paneling detail in the west and east wings and formal dining room. The large outdoor patios, quiet terraced garden areas, and rolling wooded hills weave around the many and varied buildings of the estate providing perfect fresh-air spaces for social gatherings, art classes or any function. The Mansion, Field House, Barn, Art Center, Carriage House and Artist-in-Residence facility have all seen renovations over the last decade making a truly extraordinary community asset.

The property is managed by a commission established by the Village of Granville. The Bryn Du estate is a long-term asset to the community that provides a place for cultural, recreational, and educational activities for people of all ages. The Bryn Du Commission's mission of historic preservation and program development will contribute to the vitality and quality of life of the Granville community.

[www.bryndu.com](http://www.bryndu.com)

# Granville Police Department

2022 was a challenging year, but a rewarding one. I was very pleased that our crime went down, while at the same time our number of self-initiated calls went up. This has helped to demonstrate that our service-oriented philosophy, along with the officers' proactive approach to patrol, has resulted in better service to our residents and visitors. Our officers received a tremendous number of compliments by phone, email, and letter, all occurring during a time when law enforcement of any type have normally received only negative feedback. I appreciate all feedback, but the compliments thanking my dispatchers and officers are special.

I credit this, not only to our employee's work ethic, but to the people who live and work in this community. We are exceptionally fortunate to work in a place where such a positive attitude can be found among the residents. For your support, I, and my supervisors and officers, thank you. If you have any concerns related to public safety, or if you need assistance in finding help in any other area, please feel free to reach out to us at any time. Our main number is (740) 587-1234, and our office is staffed 24 hours a day.

To view the complete annual report follow this link [2022 GPD Annual Report](#).

Some new faces you might have seen around town!

(L-R) Officer Andy Kuhnash; Officer Sarah Pope; Officer Andres Monsalve; Officer Brent Mull

We felt it was important to qualify the "new" in the title, as a few of these people have been around Granville for a while. Sarah Pope has been a part-time officer, but was hired full time in 2022. Similarly, Andy Kuhnash has served Granville Township as a firefighter for over a decade prior to joining GPD as a part-time officer. Finally, Brent Mull has been a resident for years, prior to joining GPD as a reserve officer.

# Police Department Training

- All officers completed the Ohio Peace Officers Training Commission's 24 hours of continuing professional training (CPT) which included classes in diversity, inclusion, equity and response to domestic violence.
- Officer Kaffenbarger completed ALICE instructor training.
- Lieutenant Wilson, Lieutenant Marietta and Officer Nicodem completed the Bomb Threat Management webinar.
- All officers received training in report writing as part of our annual in-service.
- Chief Caskey, Lieutenant Wilson and Sergeant Halbakken attended the U.S.S, NTAC seminar and debriefing.
- Lieutenant Marietta attended Evidence-based Prosecution with the Licking County Prosecutor's Office.
- Officer Newlun attended Field Training Officer at OPOTA.
- Officer Kaffenbarger attended SORAT (Single Officer Response to Active Threats).
- Officer Monsalve attended the CIT-refresher course with Behavioral Health Partners.
- Lieutenant Wilson and Officer Newlun attended Background Investigations.
- Officer King attended Advanced Patrol Rifle training.
- Sergeant Costa attended the Active Shooter Preparedness webinar.
- Officer Sarah Pope attended ARIDE.
- Officer Josh Pate attended precision rifle training.
- Officer Newlun attended Defensive Tactics Instructor.
- Sergeant Dailey and Officer Nicodem attended the National K-9 Officers Conference in Nashville, TN.
- All officers completed the yearly pistol, shotgun and rifle qualifications.
- All officers attended the use of force legal update with the Village Law Director.
- All officers attended the legal update with the Village Law Director.

# Service Department

## TREE MAINTENANCE

Tree maintenance, removal, and planting of new trees are another area in which much progress was made in 2022. The Service Department has been performing all tree maintenance and removals in-house. Prior to 1989, this function was contracted out to the private sector.

Performing tree maintenance and removals within the Service Department has resulted in more work being done and GSD response time to dangerous situations has decreased dramatically.

In 2022, the Tree and Landscape Commission oversaw the planting of 25 trees totaling \$9,355.00 to ensure that these trees remain in excellent condition, Granville's Tree and Landscape Commission contracts to the private sector to provide appropriate training, pruning, fertilization and other maintenance as necessary.

Service Department and Tree and Landscape Commission efforts since 1991 landed Granville "Tree City USA" recognition by the National Arbor Day Foundation. Tree City USA is recognition for communities effectively managing their tree resources.

During 2022, the Granville Service Department devoted 1765 hours to tree maintenance and removals. This figure includes trimming low hanging limbs away from signs, sidewalks, walk paths and park areas. GSD trimmed and removed deadwood in 529 trees with an additional 54 removed and stumps ground due to age, decay, unsafe conditions.

## MONTHLY BRUSH PICKUP

In 2022, 731 personnel hours were devoted to monthly brush pickup and storm clean up chipping 44 loads. Comparatively, 2021 resulted in 682 personnel hours chipping 40 loads.

## LEAF PICKUP

Toward the end of October, 2021, the annual leaf pick-up program began running approximately 10-12 weeks requiring 1,081, hours and dumping 168 loads of leaves (approximately 2,520 cubic yards). Comparatively, in 2021, 1,331 hours and 174 loads of leaves were disposed.

## GROUNDS MAINTENANCE

The Village of Granville currently maintains approximately 101.28 acres of land that requires trimming and mowing. In addition, hardwood mulch is installed semi-annually to tree pits in the downtown area and islands along West Broadway. In 2022, the Village contracted out 80 acres and the Granville Service department employees mows and trims selected right away.

# Service Department

## STREET MAINTENANCE

All pavements require maintenance due to the loads and stresses of nature. Natural stresses caused by moisture and temperature changes can cause fatigue on pavements. Repairing cracks and other surface breaks routinely help prevent serious defects. It is cost effective if minor defects are corrected quickly and pavement sealed routinely to protect against intrusion of water and deterioration.

Cold patch is used during the fall and winter months to fill potholes when freezing, thawing cycles occur, and when manufacturers discontinue production of hot asphalt. 13.5 tons of cold-patch was applied to streets in the Village requiring 212 personnel hours. Comparatively, in 2021, 2 tons of cold patch was applied requiring 3 personnel hours.

GSD also provides crack sealing. In 2022, 2,385 pounds of material were applied on miscellaneous streets and areas of the walk path along Newark Granville Road. Crack seal material cost total=\$2,048.

## SIDEWALK REPAIRS

The Service Department makes repairs and replacement to sidewalks that maybe damaged by a trees that are in the village right of way and install concrete pads for memorial benches. In 2022 Village crews pours approximately 40 cubic yards. 591 Personnel hours devoted to removing, forming and pouring new sidewalks along with grading and seed and strawing areas.

## BRICK REPLACEMENT

Service Department made annual downtown crosswalk brick repairs and N. Main St. brick replacement. This consisted of removing old brick and adding material to level areas for safe walking and driving. 133 Personnel hours devoted with miscellaneous materials.

## SNOW AND ICE CONTROL

Snow and ice control are an annual operation that varies in cost each year, according to the weather. In the mid 80's, the Village used liquid salt brine and had two trucks on the road to treat 15 road miles. It took approximately 4 1/2 to 5 hours to apply one coat of brine to Village roads. In 1989, the Village converted from using liquid salt-water brine to rock salt and our road miles increased to twenty-one because of the east Granville annexation. Since then, due to various annexations, subdivision developments, Granville Village currently maintains approximately twenty-seven road miles.

In 2021, 434 tons of salt was applied to Village roads requiring 572 personnel hours. Comparatively, in 2021, 424 tons of salt was applied to Village roads requiring 572 personnel hours. These hours include overtime, periodic inspections and clean-up of sidewalks, facilities and vehicles.

## Service Department

Ongoing road, water, storm and sanitary sewer capital improvement projects continued in 2022. Listed below are the capital improvements that were performed.

PROJECT	CONTRACTOR	CAPITAL IMPROVEMENT	COST
E. College	Shelly Co.	Mill and pave with all manhole, and water boxes adjusted	
Glyn Tawel Dr.	Shelly Co.	Mill and pave with all manhole, and water boxes adjusted	
Colomen Gwen, Carreg Cain, Gwennol Ln. with ADA ramps installed	Shelly Co.	Mill and pave with all manhole, and water boxes adjusted	
		<b>TOTAL</b>	<b>\$481,627.07</b>

### EQUIPMENT MANAGEMENT

Equipment Services is responsible for maintaining all Villages owned vehicles and equipment. Parts inventorying, inspections, scheduling and recording preventative and normal maintenance and analyzing equipment costs are also a function of this division. The Village currently staffed with one full-time Mechanic. Currently, the Village operates and maintains over Seventy-five vehicles and equipment as well as many other smaller pieces of equipment, due to a heavy workload of vehicle maintenance the past few years an additional employee when possible has assisted the mechanic. 2022 personnel hours were devoted to equipment management processing approximately 250 work orders relating to emergencies, preventative and scheduled maintenance. Listed below are departments within the Village and number of work orders completed in 2022:

DEPARTMENT	WORK ORDERS COMPLETED 2022
Police Department	76
<b>Service Department</b>	<b>132</b>
Water Department	22
Waste Water Department	20
<b>TOTAL WORK ORDERS</b>	<b>250</b>

# Water Department

The Village's goal is to provide our customers with safe water, both chemically and bacteriologically for all domestic purposes. Granville's water treatment plant has been in continuous service since 1969. The design flow of the Treatment Plant is two (2) million gallons per day. Current daily and peak demand continue to be satisfactorily met. In 2022, the average daily pumpage was 0.761 MGD, the peak flow was 1.04 MGD and the minimum flow was 0.510 MGD. The total flow for the year was 278.86 MG. The treatment process consists of treating ground water with aeration, addition of hydrated lime (for softening), coagulation, flocculation, sedimentation, recarbonation (with carbon dioxide), filtration, chlorination (with sodium hypochlorite solution), and fluoridation (with hydrofluorosilicic acid) which produces a high quality drinking water that complies with all present Ohio E.P.A. standards for Public Drinking Water Supplies. The plant serves about five thousand six hundred (5600) customers through one thousand six hundred and ninety (1690) service connections, and supplies water to Denison University, Owens Corning Technical Center, Kendal at Granville, Middleton Senior Care Facility, and the Village of Alexandria. The 2022 Consumer Confidence Report will be delivered to all Granville water customers before July 1, 2023 as required by law. The Consumer Confidence Report, required by the 1996 Safe Drinking Water Act Amendments, must provide information on the quality of your drinking water. Included in the CCR is water source, general health information, water quality test results, how to participate in decisions concerning your drinking water, and water system contacts.

The water distribution system consists of thirty-three (33) miles of water mains of various sizes (from 4" to 16"), four hundred and ten (410) fire hydrants, two (2) water storage tanks with a capacity of 750,000 gallons of water, and three (3) water booster stations. Water loss ratio, comparing water production to metered consumption showed an unaccounted for water percentage of about 30%.

## Other Items of Interest in 2022:

- All fire hydrants were flushed as per normal schedule.
- 1645 dry tons of waste lime sludge was removed directly from the concrete sludge lagoons at the treatment plant and hauled to farmers fields for land application to improve soil quality.

# Water Department

The Water Department was hard at work last year, effecting the following improvements or repairs in 2022:

- Conducted a Village-wide leak survey. As a result, one major water main break was located and repaired. A second main break was reported by customers and repaired.
- Twelve ¾" water service line leaks were located and repaired.
- The Village changed its policy concerning new and replacement water meters. Beginning in 2020, all new and replacement water meters will be the pit type meter, installed outside, rather inside the customers building. Seventeen water meter pits were installed throughout the Village.
- The original control panels at two booster stations were replaced along with two variable speed pumps.
- The 250,000 gallon water storage tank was replaced.

Emergency: After hours or holidays call the Granville Police Department  
(740) 587-1234 — 24 hours per day

Water Storage Tank Demolition

New Water Storage Tank

# Wastewater Department

A short history of Granville's wastewater treatment system...

In 1912, the Village of Granville had the foresight to begin constructing its first Wastewater Treatment System. Although quite primitive by today's standards, the original treatment system consisted of a single Imhoff combination settling tank and digester, followed by a large sand filter. Design capacity was 0.250 million gallons per day. This was an important step forward for public health in the Granville area. Around six miles of underground clay piping was installed to collect sanitary waste and convey it to the "sewage disposal plant" as it was termed. Most of the original 6 miles of wastewater collection system piping is still in service, having withstood over a century of raw sewage passing through it.

The current Wastewater Treatment facility was completed in 1986, with a design flow capacity of 1.224 million gallons per day. It is classified as an extended aeration activated sludge wastewater treatment facility. Raw wastewater first flows through a mechanical bar screen to remove objects larger than 6 millimeters in diameter. This prevents damage and wear to the pumping and aeration equipment. The material removed by the bar screen is called "screenings."

In 2020, a perforated plate screening washer/ compressor was installed, which reduced screenings volume by 90%, making the material practically odor free. The flow is then pumped to the aeration basin for biological treatment. A mass of microorganisms that occur naturally in wastewater are aerated to remove the Carbonaceous Biochemical Oxygen Demand (CBOD) and Ammonia. This treated wastewater flows to secondary clarifiers to allow the heavy materials to settle to the bottom, while the clear water flows out of the clarifiers into the Ultraviolet Disinfection tank for disinfection. Average daily flow through the plant in 2022 was roughly 465,000 gallons per day. The treated wastewater is discharged to Raccoon Creek.

## 2022 Wastewater Department Highlights

- Clear Run lift station is under contract to be lined and plumbing replaced
- Fully integrated a new web based preventative maintenance/work order system
- Tested a system for corrosion and odor control at Erinwood lift station
- Replaced emergency generator at Erinwood lift station
- Replaced both 15 hp influent pumps

## 2022 Wastewater System Facts

- 27 miles of sanitary sewers
- 8 Raw wastewater lift stations
- 1667 customer service connection
- 0.465 mgd average daily treated
- 51.04" of precipitation was recorded at the wastewater treatment plant.
- 1169.8 mg total flow treated
- 1.224 million gallons per day—Maximum capacity

# Wastewater Department

## Where do accumulated solids go?

Accumulated solids are removed from the treatment plant aeration system to maintain the optimum levels of microorganisms for effective treatment. These accumulated solids are treated by aerobic digestion and lateral flow thickening units that were installed in 1996. The solids are then dewatered by a belt filter press that was installed in 2002. The dewatered solids are then applied to farm land as a nitrogen supplement by a contracted environmental waste spreader, per regulations of the Ohio EPA.

## How many miles of piping are in our wastewater system?

The Wastewater Division crew operates a combination sewer cleaning machine for preventive maintenance cleaning of the main line sanitary sewers to help prevent sanitary sewer overflows and backups into buildings. The crew maintains approximately twenty-seven (27) miles of underground piping and eight raw wastewater pump stations which collect raw wastewater from homes and businesses.

## Removal Efficiencies

Ammonia: 98.1% or 114.3 lbs. / day

Suspended Solids: 96.9% or 1,722 lbs. / day

Carbonaceous Biochemical Oxygen Demand (CBOD5): 99.1% or 714.3 lbs. / day

Biosolids Land Applied to Farmland:  
47.3 dry tons

## Emergency

After hours or holidays, call the Granville Police Department  
(740) 587-1234 — 24 hours a day

Call Kelly Moore for questions regarding water and sewer bills @ 740-587-1400
